Candidate: Technical Project Manager — SQL • Python • BI Tools — Data Strategy & Products

EXPERIENCE

Technical Project Manager

Jan 2025 – Present

Floaty AI

Atlanta, GA

- Led cross-functional initiatives to integrate enterprise AI systems across multiple LLM providers, coordinating between engineering, product, and operations teams.
- Facilitated sprint planning, backlog refinement, and milestone tracking to ensure on-time feature rollouts.
- Analyzed system performance and usage data to identify optimization opportunities, driving a 40% reduction in response latency.
- Developed technical documentation, workflow diagrams, and rollout plans to standardize AI integration processes.
- Presented progress updates and strategic recommendations to leadership, aligning AI initiatives with operational goals.

Technical Project Manager

May 2024 – Dec 2024

Calculyte.com

Remote

- Directed backend platform development initiatives supporting high-volume API services, coordinating engineering deliverables across sprints.
- Collaborated with frontend developers and product stakeholders to translate business requirements into structured implementation roadmaps.
- Maintained transparent status reporting and facilitated cross-team communication in Agile environments.

Patent Examiner (Image Processing Art)

Apr 2024 – Aug 2024

United States Patent and Trademark Office (USPTO)

Remote

- Conducted structured analysis of technical AI systems and large-scale patent datasets to support regulatory decision-making.
- Prepared formal written evaluations communicating findings to inventors and senior technical reviewers.
- Collaborated with cross-functional review teams to ensure compliance with USPTO standards and timelines.

PROJECTS

Holiday Sales Analytics Dashboard | Power BI, SQL, Data Modeling

2025

- Designed and developed an interactive Power BI dashboard analyzing holiday sales performance across countries, customer segments, and shopping channels.
- Modeled and transformed transactional datasets to evaluate KPIs including revenue (€7.09M), profit (€5.45M), YoY growth, unit pricing, and channel distribution.
- Documented dashboard workflows and presented insights to stakeholders, supporting data-driven decision-making and process optimization initiatives.

AI Workflow Automation Platform | Python, APIs, AI Systems

2024 – Present

- Designed a microservice pipeline integrating AI APIs for transcription, content generation, and media automation.
- Developed structured process flows and documented integration points to improve operational repeatability.

SKILLS

Data & BI: SQL, Power BI, Tableau, SSIS, SSMS, Fabric, Alteryx

Programming: R, JavaScript, Java, Python, C++

Workflow & Project Tools: Jira, Miro, Trello, SharePoint, PowerApps, Power Automate, Excel

Concepts: Analytics Engineering, System Design, Stakeholder Management, Product Management, AI/Machine Learning

EDUCATION

University of Maryland, Baltimore County

Baltimore, Maryland

B.S. in Computer Science

- GPA: 3.5, Dean's List
